The 12-month residential MS Business Analytics and Information Management (MSBAIM) program equips you to extract meaningful insights from data and to deploy state-of-the-art information technologies and analytical techniques. The program's rigorous 36-credit hour STEM-designated curriculum and real-world application through experiential learning will prepare students to meet the growing data science demand. You will develop proficiencies with Python, SAS, SQL, R, Hadoop, Minitab, Gurobi, and various big data technologies. You will apply knowledge to solve real-world problems through the industry consulting practicum. You may also elect to participate in paid professional development opportunities such as: 1-year LeetCode subscription, INFORMS Conference registration, AWS Certification, Tableau Desktop Specialist Certification, and more.

- Award-winning Management Information Systems and Quantitative Methods faculty.
- Coursework infused with analytic technologies and platforms like Python, SAS, SQL, R, Hadoop, Minitab, Gurobi, and other big data software.
- Successful graduates of the program may be eligible for STEM OPT extension.
- Experiential learning opportunities like case competitions, industry practicum course, INFORMS poster competition, Krenicki Center for Business Analytics & Machine Learning consulting projects, and the Future Edelman Impact Award contest.
- Paid professional development opportunities like 1-year LeetCode Subscription, AWS certification, INFORMS Certified Analytics Professional (CAP) certification, Tableau Desktop Specialist certification, INFORMS conference registration, and more.

I came in with a lot of business knowledge and wanted to focus on building technical skills. Other students have programming knowledge or coding skills and want to focus more on management. MSBAIM allows you the flexibility to tailor your education for the role that you want.

MICHAEL JONELIS, MSBAIM ’22

August 2023
